

International Roadshow of Forum Digital Technologies 2025 – GreenTech UK

Purpose of the FDT Roadshow

The aim of the annual international FDT roadshow is to promote visibility, transfer of results and networking opportunities for selected funded projects from current [technology programs](#), thereby presenting innovative ideas and solutions from Germany on the international stage, especially among European partners. The focus of the hands-on exchange is on value creation and exploring future bilateral collaboration opportunities for German and British stakeholders from academia and industry.

Focus Topic 2025: GreenTech – Circular Economy

Digital technologies and the services derived from them play a crucial role in facilitating the ecological transition of the economy. Through the GreenTech Innovation Competition technology programme, the Federal Ministry aims to bolster Germany and Europe as prominent high-tech hubs for digital technologies and business models. This initiative makes a significant contribution towards attaining climate and environmental protection objectives while also strengthening the German and European technological sovereignty.

Date & Location Roadshow 2025

Monday, 15 September – Thursday, 18 September (London & Birmingham)

Participating Projects (Technologies & Industries)

[BeverGreen](#) leverages green [digital twins](#) to increase energy efficiency in the [beverage industry](#).
